

Nutrition Education

This is the second in a series of eight handouts summarizing the statewide results for each category of the School Wellness Policy Report. All handouts are available at <http://www.sde.ct.gov/sde/cwp/view.asp?a=2626&q=322168>.

Background

The Child Nutrition and WIC Reauthorization Act of 2004 (Public Law 108-265) required that schools participating in the U.S. Department of Agriculture’s child nutrition programs establish a school wellness policy by the 2006-07 school year. During the 2007-08 school year, the Connecticut State Department of Education (CSDE) conducted a review of district school wellness policies in partnership with the Rudd Center for Food Policy & Obesity at Yale University. In June 2008, each district received a *School Wellness Policy Report*, which included district, state and District Reference Group (DRG) scores for comprehensiveness and strength in seven policy categories: Nutrition Education; School Meals; Other School Food and Beverages; Physical Education; Physical Activity; Communication and Promotion; and Evaluation.

Results

Federal law specifies that school wellness policies must include goals for nutrition education that are designed to promote student wellness in a manner that the local education agency determines is appropriate (see Data Summary 1). Almost all (99 percent) of Connecticut school wellness policies met this requirement.

Based on state standards, Figure 1 below indicates the percent of public school districts receiving a score of 2 (strong statement), 1 (weak statement) or 0 (not mentioned) for each policy item in the *Nutrition Education* component. Weak statements are hard to enforce because they are vague and/or only recommended. Strong statements include a concept followed by specific plans or strategies for implementation and use wording that indicates action is required. Detailed information on policy scoring is contained in the *Coding Tool for Connecticut School Wellness Policies* at http://www.sde.ct.gov/sde/lib/sde/PDF/DEPS/Student/NutritionEd/SWP/SW_CodingTool.pdf

Weak statements often use words such as *may, can, could, should, might, encourage, suggest, urge, some, partial, make an effort* and *try*. Strong statements use words such as *shall, will, must, have to, insist, require, all, total, comply* and *enforce*.

Results by District Reference Group

District Reference Group (DRG) is a classification system in which districts that have public school students with similar socioeconomic status and need are grouped together. DRGs are based on the following seven variables: income, education, occupation, family structure, poverty, home language and district enrollment. They include nine groups, from group A (very affluent, low-need suburban districts) to group I (high-need, low socioeconomic urban districts). Charter schools, Connecticut Technical High Schools and Regional Educational Service Centers are not given DRGs. For additional information, see http://www.csde.state.ct.us/public/cedar/databulletins/db_drg_06_2006.pdf.

Figure 2 shows the average *Nutrition Education* strength score for each DRG. There were no reliable differences among the DRGs in scores for this component.
